

Dear Chairman Powell,

Media is essential for democracy for the diversity opinion. Limiting market share of an ownership of media industry, perhaps less than 20 % of total communication market, is critical for maintaining diversity for our democracy and prosperity. Dictators and communist leaderships have been born out of controlling media. Don't create another scandal such as corporate governing, and Wall street and accounting industry shelf policying. Our country has suffered enough. Bussiness should be operated for the bottom line, which isn't necessarily for the public interests. Bussiness will tell you it's public's interest having large media corporation, because we deliver cost effective service to public. Really! They have no intentions telling their other interests. Everthing has price. Willing to pay the price for the democracy, if need be. Already enough for declining media journalism in our country.

Respectfully, Yong
